THE PROBLEM

Outreach is broken. Here's why.

97%

**of cold emails
get ignored**

Generic templates blend into noise.
Prospects delete without reading.

14h

**per week on
manual research**

Sales reps spend more time
researching than selling.

2%

**average cold
call conversion**

Personalization is the fix, but it doesn't
scale with humans alone.

THE SOLUTION

AI does the research. AI does the video. You close the deal.

AI Lead Generation

- Scrape & enrich prospect data automatically
- Company intel, role, recent activity, pain points
- Score & prioritize highest-value targets
- Build hyper-targeted prospect lists

AI Video Avatars

- Realistic AI avatar speaks to each prospect by name
- Dynamic variables: company, role, pain points
- One recording becomes 1,000 personalized videos
- Embedded in email, LinkedIn, or landing pages

HOW IT WORKS

Three steps from stranger to booked meeting.

01

Target & Enrich

We identify your ideal prospects and pull deep intel — job changes, company news, tech stack, pain signals.

02

Generate Videos

Your AI avatar records a single template. We merge in each prospect's name, company, and personalized hook.

03

Deliver & Track

Videos land via email sequences or LinkedIn. We track opens, watches, and clicks — then surface hot leads.
