

Core Operating SOPs

The delegatable engine. Each procedure is written so the VA can run it without you. If it isn't written, it can't be delegated.

You keep: filming direction, sales calls, the offer, and client relationships. Everything below moves to the VA — lowest-value work first.

Buyback order: editing & captions → scheduling → engagement/DMs → research & calendar → prospecting drafts.

Contents

SOP 01 · Video Editing & Captions

Owner	Content Producer / VA
Trigger / cadence	Each batch of raw footage lands in Drive (after a content day)
Tools	CapCut (edit), Canva (brand polish, captions, thumbnails)

Definition of done

On-brand, captioned, hook in the first 1.5 seconds, exported vertical 9:16, named correctly, and sitting in the 'Edited' folder ready for QA.

Steps

1. Pull the next raw clip from Drive > Raw. Log it in the Production Tracker (set Edit Status = Editing).
2. Trim to a single idea. Open on the strongest hook; cut all dead air in the first 3 seconds.
3. Target 20–45 seconds. If two ideas exist, split into two videos.
4. Add captions (auto-caption, then proofread — especially treatment names and medical terms).
5. Apply the Canva brand kit: fonts, colors, lower-thirds, and a branded end card.
6. Add light b-roll / text emphasis on the key claim; keep pacing tight.
7. Export 1080×1920, MP4. Name: Client_Pillar_ShortTitle_v1.
8. Move to Drive > Edited. Set Edit Status = Done and QA = Pending in the tracker.

Quality bar (the founder's standard)

- No claim the client can't legally or medically make.
- Captions readable on mute; no typos in clinical terms.
- Looks like the best content the brand has ever produced — that's the guarantee.

SOP 02 · Scheduling & Posting

Owner	VA
Trigger / cadence	After QA pass + client approval
Tools	Buffer or Meta Business Suite; native apps as backup

Definition of done

~5 approved videos per week scheduled to the right platforms at peak windows, captions and hashtags set, tracker updated to Scheduled/Posted.

Steps

1. Confirm the video is QA = Pass and Client Approved = Approved in the tracker. Never schedule unapproved content.
2. Write the caption: hook line, value, soft CTA (e.g., 'DM us to book a consult'). Match the client's voice.
3. Add 3–5 relevant, non-spammy hashtags and the location tag where useful.
4. Schedule per the tier's platform mix (Foundation 1+repurpose, Growth 2–3, Authority all + LinkedIn).
5. Post into the best windows; spread ~5/week so no day is empty and none is flooded.
6. Log the scheduled date, platform(s), and post link in the tracker. Set Posted? = Scheduled, then Posted when live.

Guardrails

- Repurpose, don't duplicate awkwardly — reframe captions per platform.
- If anything looks off-brand at this stage, send back to QA — do not post to hit a quota.

SOP 03 · Engagement & DMs

Owner	VA (first-reply) → founder/closer for booking
Trigger / cadence	Daily — once or twice
Tools	Native apps + GoHighLevel for lead capture

Definition of done

Every comment and DM gets a fast, on-brand first reply; genuine leads are captured in GoHighLevel and routed to the closer; nothing sits unanswered overnight.

Steps

1. Once or twice daily, sweep comments and DMs across all active platforms.
2. Reply to comments warmly and on-brand; like and respond to questions to lift reach.
3. For inbound DMs, send the approved first-reply (answer the question, then offer the next step).
4. Spend ~10–15 min proactively engaging the client's ideal audience (local, relevant accounts).
5. Tag any genuine consult interest as a lead in GoHighLevel and notify the closer.
6. Log DMs/inquiries and consult interest so they flow into the monthly ROI report.

Escalation

- Booking conversations, pricing, and medical questions → hand to the founder/closer. The VA opens the door; the closer books.
- Complaints or anything sensitive → escalate to the Managing Director immediately, do not improvise.

SOP 04 · Prospecting & Outreach

Owner	VA drafts → founder approves voice & sends
Trigger / cadence	Daily — 20 touches/day
Tools	Prospect scorer output, GoHighLevel, email/DM

Definition of done

20 personalized outreach touches go out per day to scored A-list prospects; every touch and reply is logged; booked calls land on the founder's calendar.

Steps

1. Work the A-list first: premium + well-reviewed (4.7★+) + invisible on short-form video (no Reels / posts rarely).
2. Personalize each message — reference their actual strength (e.g., a strong blog topic) and the gap (it's not on video).
3. Lead with the outcome: turn their expertise into short-form video that books consults — no ad spend, they film once a month.
4. Send 20 touches/day across DM and email; vary the opener, keep the core pitch consistent.
5. Log every touch in GoHighLevel; set follow-up reminders (a 2nd and 3rd touch lands most replies).
6. On a reply, drop in the approved objection responses; the only deadline is the slot — 3 spas/month.
7. Book interested prospects onto the founder's calendar for the close.

Approved CTA

“\$1,500 deposit reserves your slot, your content day, and your launch pricing. I only take 3 spas a month. Want the link?”

Guardrails

- The VA drafts and sends in the founder's approved voice; the founder owns the close and never delegates pricing.
- Never promise specific results or income — guarantee the quality of the work only.

Document the SOP before you hand it over — if it isn't written, it can't be delegated.
